Course Structure

The course offers a unique opportunity for learners to identify and solve real problems by designing and making products.

Learners will be prepared to participate confidently and successfully in an increasingly technological world; and be aware of, and learn from, wider influences on design and technology, including historical, social/cultural, environmental and economic factors.

Learners will work creatively when designing and making and apply technical and practical expertise, in order

to:

- design practice
- independent learners
- understand the key principles of designing and making
- make a quality prototype
- analyse existing products and produce practical solutions to meet needs
- analyse good design

- understand the underlying technical principles within design and technology

Examination/

Coursework 50%

(Includes a practical task)

Written Exam 50%

2 Hour paper at the end of Year 11
